Druggist and Veterinary Surgeon To Locate Here

New Drug Store To Open on Saturday, October 31.

Mr. R. S. McClelland of Mirror has rented the Tredaway building formerly occupied by the Bannister Electric, and will open on Saturday, Oct. 31st with a full line of drugs, stationery, and everything that is to be found in an up-to-date drug store.

Mr. McClelland is not only a fully qualified druggist, but is also a graduate of the Ontario Veterinary College, and in this respect will fill a long felt want in the district.

The Bannister Electric have moved next door into the part of the building occupied by Mr. Tredaway, who has given up his office for the time being.

ANOTHER BOOSTER

Now that the winter evenings are close at hand we may look forward to pleasant evenings under the auspices of the Board of Trade. Those who have not already joined up should do so immediately, and come along and hear the opinions of men possessing intimate knowledge, not only of local matters, but of world affairs as well. Not only are capable addresses given at these sessions of the Board of Trade, but the local would-be orator, politician, farmer or business man may, if he wish, arise and expound his own views on the subject of the evening.

The street is not the best place for developing intelligence, and the young men of Crossfield and the vicinity should be only too glad to avail themselves of the opportunity given them by coming to these sessions of the Board of Trade.

The Board has put in two years of good, solid work, and is no longer a child in its swaddling clothes. Members recall with pride many a pleasant evening spent together since the inception of the Board; and the community has every reason to be proud of the work done for the children in making the park presentable and putting in the swings, slides etc. and in the share taken by the Board in the recent school fair and sports.

There is no room for the fellow who says things are getting worse and worse, but there is always room and a welcome for the man—from seventeen to seventy, and then some—who can wear a smile on his face, and who can say with pride to his city brother, "Yes, sir, I am a member of the Crossfield Board of Trade; the boys who helped put Alberta on the map." (Signed) Yours for Co-operation.

Robert Gardiner, M. P. To Speak at Beddington

Mr. Robt Gardiner, M. P., president of the United Farmers of Alberta, will give an address at Beddington, Mon. evening, Nov. 2. Mr. Gardiner will give a detailed report on the last session of parliament and it will be worth any one's time to drive down and hear him.

THE MARKETS

Crossfield, Oct. 22nd.

Mrs. J. Robertson left on Wednesday to attend the annual Convention of the Catholic Women's League to be held at Lethbridge this week.

Threshing it practically finished in this district, most the machines pulled in a week ago, but there is still the odd machine running.

Anniversary Services and Social Well Attended

The anniversary services in connection with the Crossfield and District United Church were held on Sunday last, conducted by the Rev. Rex Brown of Calgary.

Services were held in the morning at Rodney and at Crossfield in the evening. The attendance at both services being very gratifying. At the evening service the choir rendered two anthems, "Near or My God to Thee" and "Fear Thou Not." Mrs. J. P. Winning also sang "How Lovely is Thy Dwelling." Rev. Brown preached two eloquent sermons, and at the close congratulated the choir on their singing.

Rev. Brown who is an old-timer in the Carstairs district and well known in this district was shown at the close of the service by the many hearty handshakes and expressions of past memories.

Anniversary Social

On Monday evening the annual Anniversary Social was held in the Masonic Hall, when a large attendance was again the order. Mrs. R. T. Amery and Mrs. R. M. McCool were in charge of the programme, and are to be congratulated on the manner in which everyone was kept busy finding out the solution of the various games. Twenty-six old photographs of some of Crossfield's citizens were displayed on the walls. To see a picture of one taken some 50 and 60 years ago, kept one guessing as to its identity. Mrs. J. P. Methers and Mrs. N. Johnson had the most correct solutions. The spoons and the beans caused roars of laughter.

At the close of the games a short musical program was rendered; the artists being Mrs. Winning, Miss V. Methers, Mr. E. Collier.

Presentation to Mrs. Casey
The next item was a presentation to Mrs. Casey which consisted of a waterless cooker, presented by the ladies of the congregation. Rev. Young spoke of the valuable services rendered by Mrs. Casey to the United Church, both at Tany-Bryn and Crossfield. Mrs. Casey suitably responded.

The men folks now took their turn in the proceedings, and served refreshments to all present, and as the old saying goes "many hands make light work," the job of serving tea, coffee, cake and sandwiches was made to look a small job. With the singing of "Blest be the tie that binds" the evenings enjoyment was brought to a close.

Council Issue Warning

The Mayor and Council are determined this year to put a stop to wilful damage to property on hallowe'en night. No one has any objection to the numerous pranks pulled off on this occasion but to remove and destroy property is a horse of another color. Citizens are entitled to the protection of their property at all times and hallowe'en is no exception.

The Village Constable has been given instructions to obtain the names of all implicated in any damage or removal of property, and police court proceedings will follow.

Last year at Innisfail it cost the parents of several youths over \$80.00 to pay for damage to property their children had done on hallowe'en night.

Mother of Local Business Man Passes Away

On Saturday afternoon Mr. Ivor Lewis received word of the death of his mother in Cardiff Wales. Mrs. Lewis had been in her usual good health when retiring at night and passed away peacefully during her sleep.

Don't forget the Whist Drive and Dance in the U. F. A. Hall on Friday, October 30th.

Dysentery Is a Very Dangerous Bowel Complaint

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes: "When my husband was in France he took dysentery, and was in hospital for a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours. I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

The Western Spirit

Are the people of Western Canada losing, or in danger of losing, that fine pioneer spirit which enabled them in the past to tighten their belts and hang on through times of stress and hardship, and that optimism which, looking to the future, could distinguish the silver lining to the cloud which presently loomed above them? Are the people of this generation losing, or have they lost, that sense of life which carried their forefathers into the forests of old Ontario and Quebec to hew out homes, and which inspired the men and women of a generation ago to trek to the vast prairies of the West, build little shacks and break the virgin soil with a crude plow drawn by oxen?

These questions suggest themselves when we hear of the way in which a considerable number of people are reacting to the existing difficulties confronting them during this period of world-wide depression. Unquestionably many men and women are facing their problems just as courageously as ever, but there does appear to be an increasingly large number who are inclined to throw up their hands and resign themselves to become objects of charity and governmental assistance. There seems to be a tendency on the part of many to depend solely upon relief supplied by others rather than make a real struggle to provide their own relief from existing difficulties.

Government assistance in times of national emergency, as the Prime Minister of Canada has described the present situation, is necessary. It is, too, assistance that can be provided by churches, charitable organizations and individuals. Some families must have such assistance, and, because the need has been created through no fault of their own, they are fully deserving of it. But there are many who can get along without it, or at least with a very minimum of such assistance, but who, because of the organization of relief measures on a large scale, are losing the attitude that they might just as well get as large a share, a full share, of what is going on.

In cities and towns cases are constantly cropping up of people who could get along without help but who, lacking pride or even common honesty, have enrolled themselves on relief lists. The writer has even heard of farmers who, having a small crop, neglected to harvest it because, they argued, they could get more government relief if they had nothing than would be the case if they had even a little of their own.

After all, times like the present call for self-denial, self-sacrifice, courageous effort to make the best of things and get along with as little as possible. Before the Great War people were asking questions somewhat similar to those appearing at the beginning of this article. Had the human race deteriorated? The stamina of the race was demonstrated in the fiery furnace of war, not only by men in the trenches, but by the munition worker, the producers of food, transportation workers, and the great mass of people everywhere and in all walks of life. Practically everybody was willing to assume their share of the burden and make their sacrifice, large or small.

A revival of the same spirit is necessary now. True, there were profiteers, and grafters, and slackers, during the war, but they were regarded with loathing and contempt then, and still are. We want none of them now. What Western Canada needs today in order to successfully tide over the existing depression, and to save the country for the future, is the old spirit which was so long the pride and boast of this country—the courage, the endurance, the optimism of the early pioneers. It was that spirit which made the country what it came to be; it was the same spirit that won the war. It is the spirit which will save the day now, both in the case of the individuals who display such spirit, and in the country as a whole. Lying down, letting "George do it," trying to get something for nothing, grumbling and fault-finding will not better the situation one whit. It will only make matters worse.

Let us as a people, individually and collectively, stand upright on our own feet and fight our way through. Where there's a will, there's a way. It can be done. It must be done, or we are but creating greater problems and piling up still larger difficulties for the future.

Ten Years Of Seed Collecting

British Columbia Has Produced Over Twenty Tons Of Various Species

The establishment for the extraction of forest tree seed which has been maintained at New Westminster, British Columbia, by the Forest Service of the Department of the Interior, has now completed ten years of service, and in that time has produced 40,940 pounds (practically twenty and a half tons) of seeds of forest trees of various species. Practically all of this has been sent to the Forestry Commission of Great Britain and the state forest services of New Zealand and Australia. The chief species whose seed has been secured are Sitka (or silver), spruce, western yellow (ponderosa) pine, and Douglas fir.

Alfalfa Good For Humans

Hey! Hey! It's good for you, Alfalfa, the cow's delight, is truly for human, according to Dr. E. V. McCollum, of James Hopkins University. The cattle food, he told a health institute called by the Milk Council of Greater Chicago, is crammed full of vitamins and is palatable in milk form. As a substitute, however, for those who do not like hay, Dr. McCollum suggested that they drink milk only from cows fed on alfalfa.

Trade conditions in the Union of South Africa continue to improve.

25c & 75c red packages. Ask your druggist for CARTER'S LITTLE LIVER PILLS.

W. N. U. 1912

Gandhi May Visit America

Indian Leader Willing If He Would Not Be Made Ridiculous

Mahatma Gandhi is willing to go to the United States at the conclusion of the round table conference if his friends can convince John Haynes Holmes, New York pastor, that the Mahatma would not be made a laughing stock.

"Holmes tells me my visit would be misunderstood, that I would be exploited, ridiculed and misinterpreted," Gandhi said.

"If others who have invited me can convince Holmes I ought to go to America I shall be glad to reconsider my decision."

"Einstein said his visit was the greatest mistake of his life because most Americans regarded him only as a spectacle. I'm not as sensitive as Einstein but I ought not to go to America unless the American people are willing to listen to my message rather than regard me as a curiosity."

Coal Imports

Increase Shown In Importation Of Welsh and Scotch Hard Coal

Anthracite coal from the British Isles, imported to Canada through the port of Montreal this season had reached a total of 550,668 tons to the end of September. The figure was 9,373 tons higher than in 1930 to the same date.

Overseas coal and coke receipts for this season are lower than last year by 105,020 tons, due to the embargo on the importation of Russian coal. The increase in Welsh and Scotch hard coal has not made up the difference. Last year 148,000 tons of Soviet anthracite was landed here.

MOURNING WARDROBE

"A death occurred in our family and I had to go in mourning. I could hardly afford to buy all black clothes, so I decided to dye what I had. I consulted our druggist and he advised me to use Diamond Dye. Everything came out beautifully: coats, wool dresses, stockings and all. I have since learned to appreciate the excellence of the black Diamond Dye. I tried another black dye and the results were impossible. I had to get Diamond Dye and do the work over. Recently I have tinted my hair a beautiful raspberry shade and dyed a rug a lovely garnet with Diamond Dye. They are real money savers—the finest dye money can buy—I truly believe."

Mrs. G.K.L., Montreal

New Advertising Idea

As Carried Out By Grocer In Denver, Colorado

The idea is not exactly new but its application is, as far as we know, A. Denver, Colorado, grocer, cutting a baseball in two, pasted one half on the outside of his shop window and the other half just opposite on the inside. That made the ball look as if it had been driven partly through the glass. A few streaks of black paint artistically grouped like cracks. Nearby, a placard labeled "A Big Hit" carried a list of bargains the store was offering.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Isn't it the very loveliest to the complexion. Tones up the skin. Soothes and banishes all blemishes. Perfect for evening wear. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Television and Radiovision Permits

The Dominion Government has granted television and radiovision permits to the newspaper La Presse of Montreal. The paper's two stations will be used simultaneously, covering Greater Montreal with television. Engineers are now rushing installation of the first station of its kind in Canada, the paper announces.

And Money Is Scarce

The battleship "Emperor of India," which was refloated after being stranded since her use as a target ship by the "Iron Duke" on June 11, was towed into Portsmouth recently, and docked. The salvage has cost about \$800 a day, or roughly, \$25,800.

We'd hate to agree to hold the baby for Mr. and Mrs. Lindbergh.

Dr. COUGHS

Take hold a spoonful of Mink's Label Cough Syrup. It will soothe your throat. You'll get relief!

MINK'S LABEL Cough Syrup

THE FARM PROBLEM now appears to be how to make one stalk grow where two grew before.

Strius, the Dog Star, is more than 30 times as bright as our own sun.

W. N. U. 1912

HER FAT HAD TO GO Activity Melted It

Exercise is the enemy of fat. If you are overburdened with superfluous flesh, call up reserves of energy to melt it. Do as this lady did—

"During the past six months, I have made steady improvement whilst taking Kruschen Salts. I have reduced 25 lbs. in weight during that period, and have benefited to that famous greater agility and liveliness—all directly attributable to that famous purgative—Mrs. W. P."

"You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet and exercise regularly."

While you are losing fat you will be gaining in energy—in endurance—in ambition. Your skin will grow clearer, and your eyes will sparkle with the good health that Kruschen brings. The old saw chafes won't hold you any more—you'll want to be up and doing—'enjoy work and active recreation will melt like top. You'll lose fat, and probably live years longer."

Commercial Canning

Fruits and Vegetables Are Canned Under Strict Government Supervision

Commercially canned products, either fruits or vegetables, have an advantage from the technical standpoint of being canned at perfect maturity and within a few hours of harvesting. At one time the canning of fruits and vegetables was almost entirely done in the home; today the modern housewife gets her winter supply of fruits from the products of the up-to-date canning factory.

The pure food laws of Canada provide that canned fruits and vegetables must be sound products made from sterilized, clean, sound, properly treated and prepared fresh fruits or vegetables by means of heat, and kept in suitable, clean containers, closed automatically or otherwise, and marked as to conform in name to the particular fruits or vegetables used in their preparation. No adulterated preservative or artificial coloring may be used in commercially canned fruits or vegetables. They may contain only pure water, sugar and salt as preservatives.

All canned products manufactured in Canada are produced under the strict supervision of the commercial canning inspection service of the Dominion fruit branch. Under this service, grades for quality are provided, and these are respectively: Fancy, choice, standard and second. The terms used to describe each grade indicate clearly and concisely the nature and character of the product which qualifies for the grade.

An Oil Of Merit—Dr. Thomas' Electric Oil is not a jumble of medicine, but a carefully selected and pushed by advertising, but the result of the careful investigation of the oil is a rare combination and it won't keep but a favor from the drug. A trial of it will carry conviction to any who doubt its power to repair and heal.

No One Escapes Tax

Germany Goes About Collection In Very Thorough Way

The thoroughness with which the German tax of 45 is collected is illustrated by the following incident that occurred at Mannheim Aerodrome, says the Geneva correspondent of the Irish Independent, Dublin.

A German citizen—a woman—was a passenger by air from Holland direct to Switzerland. She had been staying at Amsterdam, and was proceeding right through to Baile. Unfortunately, however, she alighted for a few moments at Mannheim, in Germany, and because she had stopped on a German soil she was relieved, despite her protests, of 100 marks for leaving Germany."

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Trade Opportunities

Good Market In France For Canadian Horses and Cattle

With a little adjusting of conditions here and there, there is every reason why Canada might export between 10,000 and 15,000 horses annually to France, and should also secure a larger share in France's cattle imports, which run to \$200,000,000 annually, in the opinion of Michael Sauter of Paris, who deals with livestock in a large way and who has been spending several weeks in Canada as a purchaser.

A Useful Device
A new device in Europe, an "electric ringer," instantly detects any variation in the thickness of paper, parchment or woven material, and is said to pick out weak spots in airplane fabric or reveal forgeries of checks by comparing their thickness with that of the originals.

Natural Resources Will Help Develop Churchill

Needs More Than Wheat Assets Kenneth K. McArdle

Wheat shipments alone could not make Churchill a real port, in the opinion of Kenneth K. McArdle, managing editor of the Commerce of the Nation, organ of the Canadian Chamber of Commerce, which last month conducted a tour to the new Hudson's Bay ocean port.

"But on the other hand there are vast mineral resources north of The Pas to mile 250, including large marble deposits and limitless water power and I believe that Churchill will definitely come out through the development of the natural resources which lie to the south. Leaders in the western cities are not now so enthusiastic on the Churchill scheme as they once were, but they have interested others who are contentedly on the defensive in the support of their undertaking and through their work and interest the dream of the west may come true."

He was addressing the Advertising Club of Montreal.

Big Game Hunters Secure Fine Trophies

Irish and Belgian Parties Get Splendid Specimens In B.C.

A number of hunting parties have returned to Telegraph Creek, B.C., bringing with them the greatest collection of big game trophies ever obtained in the district.

Major James Workman, of Belfast, Ireland, secured, in a newly-discovered range district, stone sheep with horns 45 inches long, believed to be the longest ever secured. Members of the Pierre Solvay party, of Brussels, Belgium, secured several splendid specimens of rams, some of record size.

The Swedish film industry, of Stockholm, had an expedition in the district all summer filming big game, and returned with 16,000 feet of film depicting all species of northern British Columbia big game in their natural habitat.

Favours Peace Movement

Declares Italy Will Consider Any Permanent Proposal

Dino Grandi, Foreign Minister, speaking at a meeting of the Rome Rotary Club where Viscount Cecil of Chelwood also spoke, reiterated what he described as Italy's willingness to consider "any proposal, method or system" likely to lead to reduction of armaments.

He agreed with Viscount Cecil that "war and unrest" are the cause of the world's present trouble and that the real remedy is disarmament.

Grandi said the proposal for an armaments treaty which he made at Geneva, was only the first step, but he expressed confidence that its "moral significance" would contribute toward a revival of international confidence.

Airways Pilot Almost Equals Hawk's Record

Files From Edmonton To Calgary In Forty-Four Minutes

Clipping off just over four and a half miles a minute, Pilot Paul Calder, of Canadian Airways, came within an ace of equalling the record set by Captain Paul Hawke, for flying time from Edmonton to Calgary.

Piloting a Fleetster mail plane, Calder travelled the 196 miles from Edmonton to the southern city in 44 minutes. Hawke, the famous Canadian speed pilot, made the distance in 48 minutes, with an international air tour right in September last year. He was flying his famous super-speed monoplane.

Would Trade Coal For Wheat

The newspaper Tagblatt said negotiations were underway for the barter of half a million tons of Ruhr coal for a quantity of Brazilian coffee in a manner similar to that in which Brazil recently traded coffee for wheat from the United States. The Tagblatt suggests that negotiations might be extended to include a trade of coal for Canadian wheat.

Buried Gold

The United States, it appears has \$5,000,000,000 in gold, almost half the world's entire supply, locked up in its vaults because much of it is doing just as much good as the untold wealth in gold that still lies deep in the earth—Christian Science Monitor.

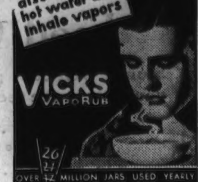

When you smile or laugh, your brain for a moment is freed from the load that it ordinarily carries.

Larkins: "The boss in my house." Sparkes: "How long has your wife been away?"

Almost one-third of the wells that are drilled for oil and gas produce nothing.

OVER 12 MILLION JARS USED YEARLY

Future For Gold Mining

Says Gold Will Be In Demand As Long As Time Lasts

While other metals may be subject to price variations, gold will be in demand "as long as time lasts," said Hon. Charles McCrea, Ontario Minister of Mines, in addressing the Thunder Bay Chamber of Mines and the City Chamber of Commerce at Fort William recently. He said he expected Ontario's gold production this year to value \$42,000,000.

Speaking of the northwestern portion of the province, the Minister said that there could be no mineral industry without mines, and he was glad to note that this section was getting mines, such as the Moss, the Howey and the properties now under development by the Comluga and the Homestead. With these as a foundation and the co-operation of the government, he believed that this section would recover the reputation it gained in the '80s and '90s.

Making the Front Page

Many Unnecessary Risks Taken In Order To Gain Publicity

Now the Wilkins' submarine has got all the newspaper publicity possible by diving under the Arctic ice and is recommended for the junk heap by one of its Norwegian passengers. We dare to entertain the hope that death of newspaper publicity will presently curtail the antics of trans-oceanic and "round-the-world" fliers. "Get a good publicity man" was the first message to his Californian wife from a stranded aviator on a Pacific island. Keep 'em off the front page and they'll stay at home—Detroit Saturday Night.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Still Partly Legible

Menu cards still partly legible after sixteen years, were washed ashore at Campobello, Ayrshire, with part of the wreckage of the "Lustania," the great Cunard liner which was torpedoed and sunk by a German submarine off the coast of Ireland in May, 1915.

Go to those headaches ... those backaches ... those morbid, at-home blues. Won't you buy a box of the new ... and you'll feel so much better.

Lydia E. Pinkham's VEGETABLE COMPOUND

LEAGUE ACTS TO AVERT CONFLICT IN THE ORIENT

Geneva.—The Council of the League of Nations overhauled Japanese opposition by voting 12 to 3 to invite the United States to participate in its discussion of measures to bring peace between Japan and China in Manchuria. The council's action revived hope that the league would be able to bring about a pacific settlement of the Manchurian controversy.

"We are still loyal members of the league and have been from the first," Kenkichi Yoshiwara, Japan's spokesman, told questioners at the end of the long secret session at which the position maintained so persistently by him and the Tokyo Government was emphatically overruled. Aristide Briand, chairman of the council, and French foreign minister, and his colleagues argued long and ardently with M. Yoshiwara.

The feeling that not only war in the far east but also the very life of the league was at stake had been growing, and each hour of delay increased fear on the part of league proponents that the institution might show weakness in a vital test. The result, therefore, was welcomed with gratification and relief in international circles which regarded the council's determination to override Japanese opposition as their eagerly desired token of vitality.

Persons present at the council's secret session reported the procedure was conducted in this manner:

M. Briand began by reading the form of invitation which already had been drafted. M. Yoshiwara read his written objections. The matter raised serious constitutional questions, the Japanese spokesman said. He contended it was much more than a question of procedure (on which only a majority council vote is required), but was indeed a question of substance (which requires unanimity).

M. Briand and Lord Reading, British foreign secretary, held no question of substance was involved. A long debate resulted between M. Yoshiwara, on one side and all the other members, except Dr. Alfred Sze, Chinese spokesman, on the other. Dr. Sze remained silent throughout.

British and French representatives declared Japan's position to be invalid on two grounds: that Japan was not a member of the league, and that she was simply becoming to a man already in the audience to come to that table.

The council was not deciding, they said, on something new, the Japanese and Chinese agreed three weeks ago to welcome close co-operation on the part of the United States; so the council was merely inviting this co-operation on the spot.

The second point made by these spokesmen was that the council was not, as Japan contended, setting a non-leader to sit at its table, but was simply beckoning to a man already in the audience to come to that table.

At the end, M. Yoshiwara suggested that the council should appoint a committee of jurists to study the juridical aspects of the problem and report Friday, October 16. Asked if they were ready to abide by the jurists' recommendation, the Japanese representative replied he could not answer that question. A vote was taken on his proposal and only Gerhard von Mutius, German delegate, sided with him.

M. Briand declared a committee of jurists would only make the situation worse. A vote was then taken on the proposal to invite the United States. M. Briand asked those opposing it to raise their hands. No hand went up but after a moment M. Yoshiwara announced that he was in opposition.

First Canadian Entrant In International Show

Saskatchewan Man Heads List For Second Consecutive Year

Chicago, Ill.—First Canadian entrant in the 1931 International Grain and Hay Show at Chicago, is James A. Paor, of Langham, Sask. Distinction for having sent in the first entry from Canada to this competitive crops display went to the same Saskatchewan grower last year.

The International Grain and Hay Show is a department of the International Livestock Exposition, which will be held at the Chicago stockyards, November 28 to December 5. Paor will be an exhibitor in the oats and rye classes of the 1931 show.

Likely To Follow Pound

Toronto, Ont.—There is a growing feeling among a number of prominent people that a large portion of the world will be disposed to follow the pound instead of the dollar," said A. F. Phillips, General Manager of the Imperial Bank. Mr. Phillips returned to Toronto recently from a holiday in Great Britain.

Lower Insurance Rates

Hope To Obtain More Favourable Consideration For H.B. Route

Ottawa, Ont.—The safe and expeditious voyage of the two freighters carrying steel grain shipments from Port Churchill on Hudson Bay to Europe, will strengthen materially the case of the Department of Marine in its efforts to secure more favourable insurance rates on vessels using Hudson Strait, Alex. Johnston, Deputy Minister of Marine, states. The efforts of the department to secure lower insurance rates will be resumed in the near future.

In summing up his report to the department, following the docking of his vessel in London on October 4, Captain W. Mount of the "Farnworth," said: "To sum up the position, and judging by the conditions prevailing this year, a vessel proceeding there (Port Churchill), in the proper season, fitted with a Gyro compass, a direction-finding outfit, and well ballasted, will experience no more difficulty in making a passage than she would in passing through Belle Isle."

Captain Mount reported very little ice sighted on the passage in and out of the straits.

The only difficulty encountered by Captain Mount was compass trouble when in certain sections of the straits, due to the proximity of the magnetic pole. At these points the compass would become sluggish and practically useless, he reported. This difficulty, however, could be easily surmounted, he said, with a Gyro compass.

Port facilities at Churchill were adequate and with dredging completed, Captain Mount believed that next year three or four vessels could load at the same time efficiently.

Premier Bennett Honored

McGill University Confers Degree Of Doctor Of Laws

Montreal, Que.—Intermingling pomp and dignity with a colourful display of warmth of welcome, McGill University conferred upon Rt. Hon. R. B. Bennett the degree of doctor of laws. And then as a climax the large audience attending the special convocation marking the opening of a three day reunion, heard the Prime Minister in an address permeated with confidence in Canada.

"Let us be confident," Premier Bennett declared after remarking that the world's troubles might not be over but Canada's would be over, the sooner Canadians marched fearlessly to meet them. "Let us be bold and put to shame those who in their assumed wisdom forecast unending trouble and in the great things that spring from fear prefer themselves and their own interests and exploitations to the welfare of Canada as a whole."

Reduced Rail Fares

Teachers and Students To Obtain Special Rates For Yuletide Holidays

Montreal, Que.—Reduced railway fares for teachers and students at schools and colleges far from home will be put in effect for Christmas, New Year and Easter holidays by the New York and Eastern Railway, the railways of Canada, it was announced here by the Canadian Passenger Association.

The round trip fares will be reduced to one and a quarter times the single fare, it was announced. Dates of the sale of "tick" tickets will be governed by holiday dates of the various schools and colleges throughout the country.

A certificate signed by the director or headmaster of the school or college will be necessary to secure the reduced fare.

Excess Freight Rates

Government Will Not Be Called Upon To Pay For Churchill Shipments

Ottawa, Ont.—The Dominion Government will not be called upon to absorb any excess freight charges for the handling of the two cargoes of wheat through Churchill this fall, it was announced by Hon. R. J. Manion, Minister of Railways and Canals.

The Dominion agreed to handle the test-shipment for the Canadian Co-operative Wheat Producers on the basis of the Fort William and Montreal freight rates. If the cost of the shipments had been higher than this rate, the Dominion would not levy elevator fees at Churchill.

Season's Work Finished

Ottawa, Ont.—The season's operations of Department of Marine vessels in the Hudson Strait area has been brought to a close and the ice-breaker N. B. McLean has left the straits to take up winter service in the St. Lawrence River. The "Arcadia," carrying the Dominion Government hydrographic survey party, has also sailed for home.

Alberta Has Deficit

Operating Deficit Of \$2,506,581 Shown For Last Fiscal Year

Edmonton, Alberta.—An operating deficit of \$2,506,581 for the fiscal year ending March 31 last, was announced by the Alberta Government. A summary of the provincial current accounts was given out by Premier Brownlee, showing the results of the government's financial operations for the year. It was pointed out by the premier that it is the first time in a number of years that such a deficit has been reported.

From 1925 to 1930 inclusive the province showed a surplus of revenue over expenditure of \$2,491,866, but that the surplus would for this last year be turned into a deficit has long since been a foregone conclusion.

In accounting for the deficit, Premier Brownlee states that two or three items alone, involving approximately \$604,000, must be considered as special expenditures not ordinarily looked for in the expenditure of one more difficult year, states. The provincial election of 1930, \$100,000; freight charges on seed and relief to drought areas, \$57,000; and extra grants to schools, \$387,000.

THINKS POUND STERLING WILL CONTINUE LOW

Quebec, Que.—The pound sterling had been "pegged" at too high a rate previously and he did not think Great Britain would ever return it to a par of \$4.865, Lord Rothermere, British newspaper peer, stated in a brief interview here before sailing for home on the "Empress of Britain."

"I don't think that Great Britain will ever return the sterling to a par of \$4.865. She will come back to a gold standard in time, but the pound was pegged at too high a rate of exchange and was economically unsound," the publisher declared.

Lord Rothermere made a flying visit to Canada to hold conferences here with representatives of the newspaper industry in which he is financially interested.

The world depression would not be over for some time and in Great Britain it need not be expected to let up for another 12 or 18 months, he said.

In reply to a question, Lord Rothermere said he thought the recent decrease in unemployment insurance payments were "all to the good." Lord Rothermere expressed the opinion that the present low rate for the Canadian dollar would give Canada a fine chance to increase her export trade.

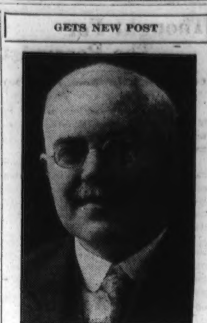

His next visit to Canada, probably before the end of the year, would possibly take him to British Columbia to inspect some property in which he was interested, Lord Rothermere said.

Using Unsinkable Boat

Lisbon.—Fritz Engler, a 30-year-old sailor, set sail October 14, for New York in a rubber boat which he claims is unsinkable. He expects to make the trip in 70 days via the Canary Islands and the Bahamas. The boat is fitted with two sails and pair of oars, and the deck can be hermetically sealed in rough weather.

Typhoon In Japan

Tokyo, Japan.—Thirty were known dead and many were missing following one of the worst typhoons in years. First reports that 200 persons were missing in the town of Oga Miyu prefecture, could not be confirmed.

Hon. John Dool, Provincial Secretary of Nova Scotia, who has been appointed Attorney-General of that Province, succeeding Hon. W. L. Hall, who has been made a Judge.

Believes Canada Will Drop Gold Standard

But Not As Permanent Measure Says Dr. Swanson

Saskatoon, Sask.—Dr. W. W. Swanson, who accompanied Premier Bennett last year when he attended the Imperial Conference, is of the belief that it will not be long before Canada follows the example of Great Britain, and drops the gold standard.

Addressing the members of the Kiwanis Club here, on the subject of "Currency and International Finance," he stated that this step would not be permanent but that actually the Dominion would return to the gold standard. He regarded financiers of the United States as only amateurs when compared with those who have controlled British finance, and declared that the pound sterling is of far more concern to Canada than is the United States dollar.

May Ask Legislation For Party Funds

Proposal Is Forecast For Next Session Of Parliament

Ottawa, Ont.—The Ottawa Citizen publishes the following: "A proposal for legislation at the next session of parliament on the subject of campaign funds is forecast as a prospective development. Whether it will emanate from a western Liberal or western Progressive is not certain, but someone, it is said to be agreed, will come forward with it."

"From the Beauchamps inquiry the repercussions have been considerable and while legitimate election expenses call for contributions, the purpose is to develop a method of overcoming this secrecy."

Contribute To Relief Work

Eastern Ministers Giving Part Of Salaries To West

Toronto, Ont.—Pastors under the jurisdiction of Toronto West Presbytery of the United Church of Canada, recently decided to donate a percentage of their salaries for relief work in Western Canada.

The decision was made at a meeting of the Presbytery held in New Toronto. Pastors with a salary of \$3,000 a year will subscribe ten per cent of their salary for a period of one year, while those on a salary of less than \$3,000 a year will give ten per cent of their salary for a period of six months.

KING GEORGE RIDES TO CHURCH

King George and Prince George are shown in their carriage as they were driven from the royal residence at Edinburgh, Scotland, to the ancient Crichton Abbey in Aberdeenshire to attend the services. The King visits Scotland each year and spends several weeks at his castle in the Scottish hills.

President Of Spain Resigns

Trouble Came Over Measures Restricting Religious Orders

Madrid, Spain.—Niceto Alcalá Zamora, who has served as provisional president of Spain since the ousting of King Alfonso XIII., six months ago, has resigned from his cabinet and was succeeded within a few hours by Manuel Azana, his minister of war.

The shift of government resulted from the measures restricting religious orders that have been incited by the assembly in the constitution under which republican Spain will be governed, and it was accompanied by spectacular street demonstrations.

Bands of Communists and anticlericals roamed the streets of Madrid singing the "Red Flag," and shouting "Down with the Catholic Church" and "Death to all Jesuits." Most intense excitement prevailed as a consequence of the latter demonstration fight over the status of the church and of ecclesiastical organizations in the new republic.

Anti-Dumping Tariff Displeasing To Italy

Newspaper States Canada's Action Regarding Imports Is Unfair

Rome, Italy.—Displeasure in Italy at the decision of the Canadian Government to apply anti-dumping tariff provisions against imports from countries whose currency has depreciated on foreign exchange markets was reflected in an editorial appearing in *Giornale D'Illustrazione*.

It is unfair, the newspaper said, to apply anti-dumping provisions against Italian imports, as the lira still remains on the gold standard, and any oscillation in its rate of exchange will be of short duration.

Reinforcing its argument with statistics the newspaper said that during the last three years the value of Canadian goods imported by Italy had been greatly in excess of the value of Italian merchandise imported into Canada.

PAINTS VIVID PICTURE OF THE HORRORS OF WAR

Ottawa, Ont.—Painting a vivid picture of the horror and desolation which must inevitably result from another war, Hon. Maurice Dupre, Solicitor-General for Canada, addressed students of the University of Ottawa on the problems of disarmament.

The forthcoming disarmament conference at Geneva, in February, 1932, will represent the first attempt yet made to bring about a general limitation or reduction of armaments based on common agreement, Mr. Dupre told his audience. Mr. Dupre was speaking at the opening of a lecture series in the University of Ottawa for the academic year 1931-32.

The post-war disarmament movement is based on agreement, Mr. Dupre said. "Its roots lie in the horror and futility of the last war; that war in which 10,000,000 men were killed and 13,000,000 missing; where the daily loss of life amounted to 16,585; where the parade of dead marching 10 abreast from sunrise to sunset, would take 46 days to pass by a given spot."

Since the war the feeling had grown that not only did armaments fail to prevent war, but that they actually encouraged war. They not only failed to give security, but they prejudiced security. "Give a man a loaded gun, and he will likely want to pull the trigger," said Mr. Dupre. "Give him one that is superior to that possessed by anyone else, and the temptation will be irresistible."

The disarmament movement has been steadily developing to culminate in the coming Geneva conference, the Solicitor-General continued. The conference was the result of 10 years steady preparation by the League of Nations. The question of its success or failure was dependent on many factors.

Mr. Dupre outlined the difficulties as well as the factors making for the success of the coming conference. Fear was the father of armaments, he said. "Remove fear and you remove guns, bayonets, poison gases and other abominations; provide security, and you can turn swords into plowshares—but not before."

There were political difficulties to be surmounted, and also technical difficulties. The challenge of new and more dangerous forms of armament must be met. He dealt with some of the possibilities presented by chemical discoveries, the effect of which would be to destroy life behind the actual fighting lines as well as in them.

LOYD GEORGE HEARD IN SPEECH OVER THE RADIO

London, Eng.—From his sick bed in the hills of Shrome, Surrey, Rt. Hon. Lloyd George, Liberal leader, broadcast his views in connection with Great Britain's general election campaign.

It was for him a novel experience. In every general election for the past 41 years he has taken an active part. Now, "out of the turmoil," to use his own expression, he campaigned by microphone. But he left no doubt in the minds of his hearers where he stood.

"This is no time for vague or hesitating talk," he exclaimed, and without hesitation he condemned the policy of protection. The danger of Socialism was remote, he asserted. But protection was an impending peril.

In the choice between a food-taxing Tory and a Free Trade Labour candidate, he said, he would have no hesitation. He would vote to avert the calamity of protection.

"It is a mean suggestion," he said, "that masses of gallant workers who went through the horrors of the war for their country's sake are not truly national unless they are prepared to join the Tory rank and return protectionist members to the House of Commons to impose tolls on bread and meat."

Why should it be imagined, he questioned, that tariffs would lift up the collapsed sovereign? Had tariffs prevented the German mark from dropping out of sight? he asked. In Victorian France "the franc was valued to one-tenth of its pre-war value."

Tariff barriers constituted one of the main causes of the slump in world trade, he asserted. Despite tariffs, Germany was experiencing the worst trade depression it has ever known. "The German chancellor predicted that the coming winter the army of workmen may reach the appalling figure of 7,000,000," he said. "In despair the workers are thronging to the Communist flag. Germany is indeed facing a bleak story of winter under the shadow of the sword."

The United States ought to be a paradise of protectionists, Mr. Lloyd George said. Its tariffs are scientifically exalted, he asserted. Yet on the British basis of computation its unemployment total over 10,000,000. Financially, the spectre of bankruptcy is stalking through the streets of this great country whose streets seemed two years ago to be paved with gold.

The federal budget shows a deficit of \$300,000,000, he said. Banks are passing into the hands of the receivers at the rate of 100 a month, 2,000 have already crashed, and many more are tottering on the verge of collapse. Exports last August had fallen 62 per cent compared with those of August, 1929.

Tariffs, Mr. Lloyd George argued, could not help a great international trader such as Great Britain.

Ship Gold To Europe

France and U.S. Control Three-Fifths Of World's Supply

New York.—The torrent of monetary gold which has been flowing from New York into the coffers of Europe was swelled recently by \$47,762,400.

This brings the total net loss of gold to approximately \$568,000,000 since September 1, most of which was taken in the last four weeks, or since the suspension of the gold standard in Great Britain.

While latest official figures are several days old, it is now estimated in Wall Street that the monetary gold stick in this country is close to \$4,500,000,000, and that France's has increased to nearly \$2,500,000,000. The two countries control roughly three-fourths of the world's entire supply.

Few Remain At Churchill

Northern Port Ready To Spend Last Lonely Winter

Churchill, Man.—This northern point is preparing to spend its last lonely winter. Only a few hundred of the thousands of men who rushed work here for completion this summer remain now, and inside of two weeks only the residents and a few watchmen will remain to guard the buildings here.

Allocas have been taken from the harbour and made ready for winter storage. The port will be thrown open next spring to the public.

In Paris, a school has been established to teach the various branches of the motion picture industry from production to distribution, by radio.

Tribute Accorded Wireless Air Force

Ottawa Man Praised Work Of Men
Who Serve In Arctic Circle

High tribute to the Canadian Government's air force and aviation in penetrating into and establishing speedy communication with the vast wastes of the Arctic Circle, was paid by Thomas Wayling, Ottawa, in an address before the Women's Canadian Club at Moose Jaw.

Mr. Wayling, who is a member of the parliamentary press gallery, Ottawa, has just completed a 4,000 mile trip across the prairies and down the Mackenzie River to the Arctic Circle in the interests of the Canadian Geographical Society, of which he is a fellow.

Painting in a vivid word picture his observations during the trip, the speaker told how wireless and aviation had joined forces to combat and check the heavy mortality from disease among the Indians and Eskimos, and to bring hitherto inaccessible regions into constant communication with the outside world.

He told of pilots on errands of mercy, fighting their way through almost impossible hazards, and of a contract described for his masters in the comfortable manner in which the modern prospector and trapper makes his way into regions never before penetrated. Gone were the days when the trapper made the long, tedious journey by canoe and dog sled, not to return until spring, the speaker said. Now, dogs and all, he is simply transported into the wilds 100 miles or so and deposited, to be picked up when the plane returns within another 10 days.

At the present time, with the economic situation badly in need of created wealth, the eyes of Canada were turning to the far north, he continued, and planes were proving one of the most important factors in prospecting for the great wealth of gold and silver which was beginning to come out of that country. He saw wonderful development for the north because of its great system of waterways which led straight down to the Arctic, the Mackenzie acting as the great trade artery.

Pay Day Reveals Pinch

British People Feel Effect Of New
Economy Proposals

Workers and unemployed in Britain alike felt the pinch of the new economy proposals pay-day both in the factories and for the unemployed who receive unemployment benefits. The householder and the farmer are not affected.

The unemployed found their benefits cut by 10 per cent. Where previously they paid 16 and 14 cents, employer and worker alike will now pay 20 cents a man, 18 cents a woman. The state pays the rest.

As for the unemployed, a man "on the dole" receives \$3.56 a week instead of \$4.08. A woman gets \$3.25 instead of \$3.60. Adult dependents receive \$1.92 instead of \$2.16. Dependent children are still allowed the rate of 48 cents. Thus the married man with his wife and two children receives \$6.54 instead of \$7.20.

Gate Crasher (at party): "These big parties are a joke. I have not been invited but nobody noticed it." Stranger: "I have not been invited either." Gate Crasher: "Really. How did you get in?" Stranger: "I am the host."—Faun, Vienna.

Get Free Ride

The Methodist Church of Currituck, North Carolina, has bought a new motor bus with which to make the rounds of the town every Sunday to take the people to church free of charge. It is said that this system will increase church attendance.

The British Medical Register contains the names of 55,291 doctors.

American apparatus is favoured in Italy's present radio craze.

"Mistress is always telling me to save the gas, but where am I to put the gas I save?"—Il Travaso, Rome.

W. N. U. 1912.

The Changing Times

Boston and Maine Railroad Shows
Orders For Train Whistle

Warnings

Officials of the Boston and Maine Railroad have made some interesting discoveries regarding engine whistle warnings. The present code, it seems, dates back to the now almost extinct horse and buggy days and is based on the speed capacity of that antiquated mode of locomotion. In when a train rattles along towards a grade crossing, it reaches the whistle post, a quarter of a mile distant from the crossing itself. There, the engineer, or whoever happens to be responsible for the signal, sounds two long and two short blasts that announce its approach, the train roars across and the incident is dismissed as a matter of ordinary routine. But the whistle aspect of the Boston & Maine was not quite satisfied regarding the degree of safety thus provided and proceeded to study the question. Before long he discovered that the problem had greater implications than appeared on the surface as further investigations more clearly disclosed.

He found that a horse and buggy, for instance, travelling at the rate of ten miles an hour, compares with an automobile, cautiously driven, averaging from thirty to forty-five. A locomotive travels sometimes as fast as sixty-five miles an hour. Four whistle blasts, he set forth, if sounded one after another, don't last a quarter of a mile over at sixty miles an hour. Of course, in horse and buggy days that didn't matter so very much, but now it does. For he learns perhaps an eighth of a mile when the train approaches the crossing without warning. And in that time an automobile may drive onto the tracks. These findings carried so much weight that the Boston & Maine has issued orders that hereafter all engines shall sound their whistles a full quarter of a mile for all crossings. Thus does greater knowledge bring progress to the world.

Some Apple Facts

One Fruit Which Combines Maximum
Of Flavour and Nutrition

The apple is, without question, the king of fruits; whether fresh, dried, evaporated or canned, it is a wholesome food, easily prepared, attractive and palatable at all times.

Apples vary in flavour and texture. They are best when picked at the hard-ripe stage, and when thus picked their quality improves in proper storage until they are marketed.

Some varieties are better suited to certain purposes than others. Broadly speaking, the highly coloured red varieties make the finest appeal to the eye and palate and are preferred for dessert. The green varieties, while a green colour usually indicates exceptional cooking quality for pie, pudding and sauce purposes. The sound tart apple is best for preserving, but care should be taken to use such apples in their season.

There is no waste to a good apple, even the paring and core are excellent for use in jelly. The apple is the one fruit which combines a maximum of flavour and nutrition.

Apples should be bought by grade and size. More care is being taken today than ever before by growers and shippers to market apples of superior regard to quality. A convenient range of container is used for the marketing of apples, and all packing is done in accordance with government standards.

Gold Does Not Make Country

Arthur Brisbane, a United States editorial writer, comments on the flying performances of the British Lieutenant Stainforth, who made a mark of 386 miles per hour and says: "A nation that can make such airplanes and find men to run them ought not to be discouraged about a few million pounds sterling one way or the other. It is what men have in their brains and hearts not the gold reserve that makes a country."

Big Barley Yield

N. A. Peterson of Hillspring, Alberta, threshed 13 acres of barley that averaged 70 bushels to the acre. The plot of land had been fertilized and irrigated, and a part of it had been sown to sugar beets during the last two years.

Prodigal—Father, I've a notion to settled down and go in for raising chickens. Father—Better try owls. Their hours would suit you better.

Death Valley is about 50 miles long and averages 20 to 25 miles wide, from the crests of the enclosing mountain ranges.

Only two per cent. of airplane accidents are the result of mechanical faults.

Switzerland has only 140 talkie theatres.

Thought For The Penmanist

Conditions Better Now Than They
Ever Were Until Few Years Ago

An Army of penmenists haunted by Major-General Naves B. Sattin has been watching the life of an for the last few years.

If an ink smelt pen is to keep a daily newspaper on an island occupied only by some modern Indian Crusoe, this Crusoe would find quite sure that we were the most poverty-stricken nations in existence.

Yet, somehow or other our nation seems to be filled with overflowing energy when the price of admission is fifty cents. I remember when they were not half so full and a poor horse asked sufficed for a passport.

In 22½ minutes on any national city street one million dollars' worth of automobiles whiz by at sufficient speed to keep the face of any undertaker wreathed in a perpetual smile.

Even men wear silk underclothing. The woman without silk hose wears pajamas for very shame. Mechanics live in their gradients. No one suggests that it would be foolish to put on a prize fight, wrestling match, or a world series this year.

Oh, yes! Things are not what they were a few years ago. But that is so much better that they ever were until a few years ago, that perhaps we need not worry too much after all.

Let's all put our money into circulation so rapidly that mills and factories will be forced to make something we can buy. First thing we know we'll come face to face with those better times that have been waiting for us to great them with a smile instead of the frown of a fat man with a bun on each foot. —Richard S. Bond.

The Most Popular Name

"Helen" Seems To Be First Choice
In Toronto

A Toronto daily has been amusing itself by going over lists of names in school prize reports to see if it is true "that not many girl babies now get old-fashioned names." It did not find this true, but the search did elicit surprises.

Of the 112 girls, six were named Helen, and this was the most common name. The next was rather unexpected—five little newcomers were the names Shirley. Mary occurred four times on the list, and Marie three. There were also four Margaret, besides a Marguerite and a Marguerite, and four Elizabethes besides two Bettys. Joan was up near the top with four tallies, and while second names were not tabulated in this count, a number of Joans were noted among these as well. Catherine, spelled variously, tallied four. These, then, are the most popular names, and they can hardly be called "newfangled."

Names which occurred three times on the list were Phyllis, Barbara and Dorothy. Names which occurred twice were Gwendolyn, Sheila, Gloria, Marilyn, Josephine, Jean and Anne.

Estimate His Speed

A young man in Orillia, Ontario, was killed by hitting a telegraph pole in the dark. First he hit a horse and killed it, throwing it 20 feet. This put the car into the ditch where he ran 188 feet, scraping off both sides of the car. Then he hit the pole and broke it, and continued for 92 feet, when the car turned over. Query: How fast was he going when he hit the horse.

A new type of street car has windows which can be opened like automobile windows, by turning a crank.

Anchor May Belong To Columbus' Flagship

Interest Centred On Exhibit In
Chicago Historical Society

Just inside the entrance of the Chicago Historical Society's Building, two large anchors, black and rugged, have stood for many years without labels to identify them to the public.

Interest was recently centered on these two exhibits when a news dispatch from Europe was sent to state that an anchor from one of the ships used by Christopher Columbus, an anchor owned by the Government of Haiti and on view at the French Colonial Exposition, had brought an offer of \$100,000, which had been refused.

The two anchors at the Chicago Historical Society were placed there after the first Chicago World Fair, and all that the society knows about them was published in 1893 in a pamphlet cataloguing the exhibits of Columbus memorabilia.

Of one of the anchors, the catalogue states as follows: "There is evidence considered conclusive that this anchor was one of those of the flagship, the 'Santa Maria,' which was wrecked off the coast of Haiti on the first voyage in 1492. It was presented by Dr. Alejandro Llesas of Puerto Plata, Santo Domingo, Dr. Llesas was at one time a resident of Cape Haitien, and while there devoted himself to a study of the voyages of Columbus."

"The second anchor, the inventory of articles left at the fortress erected here, mentions an 'anchor of the caravel.' In the course of time it was carried some distance inland, where it was found by the Columbus commissioner on an old plantation. The concurrent evidence of history and local tradition point to this anchor as genuine, as well as its shape (being of the fifteenth century type), the evidence of Columbus himself and the locality where it was found."

Historians in different centuries have mentioned it, and a learned French antiquarian has proved it to be of the type used by Columbus. "Columbus, in his inventory of articles left at the fortress erected here, mentions an 'anchor of the caravel.' In the course of time it was carried some distance inland, where it was found by the Columbus commissioner on an old plantation. The concurrent evidence of history and local tradition point to this anchor as genuine, as well as its shape (being of the fifteenth century type), the evidence of Columbus himself and the locality where it was found."

When Depression Is Unknown
Up In Northern Reaches Of Canada
They Have No Money Troubles

Unemployment, money troubles and depression in general are unknown in the northwest territories, whence comes Col. J. K. Cornwall, "Pecos River King," as he is known along Canada's arc of the Arctic Circle's circumference, says that up there everybody works, money isn't used and depression hasn't been seen.

"Takes who don't work would starve in the territories, so they don't starve up there," he said, while en route from Great Bear Lake to Toronto. "Money doesn't matter, because barter is the rule. Even if furs aren't as valuable as before, the vegetable crop along the Mackenzie is the best in years and meat is plentiful."

An electric clipper has been invented that will shear 1,500 sheep in a day, thus putting the stock exchange record in danger.

Palm trees, which now grow only in warm regions, were a feature of the landscape in most parts of North America in earlier times.

Beds about 5,000 years old and made of mere imitation of pearl and gold have been unearthed in Egypt.

Hawaii expects a record coffee crop this season.

Evolution Still In Progress

New This Universe Is Running Down
Is Only A Minor Conception

St. Oliver Lodge, speaking before the Chichester Diocesan Council, took issue with the scientists who believe the Universe is running down. Nobody knows, he said. In the end, he declared, the process may be reversed. Speculations about the wearing down of the Universe "have no philosophical basis," Mr. Oliver averred. "They do not really take everything into account. They deal with the inorganic or physical side of the universe only."

He said that evolution still is going on and it teaches the lesson "from the viewpoint of religion that the universe is one, all demonstrative and a single lesson scheme. There are many discoveries of the world of the future waiting to be made," he continued. "We only recently discovered that matter turns into energy. Why should we not in the course of years discover that energy turns into matter?"

St. Oliver said the conception that the universe is running down is "only human conception and need not rely on an end in the deary way we now imagine. The fact is we are not entitled to speculate with our present knowledge upon these tremendous themes."

The universe seems to him a great reservoir. "Life and mind are realities which I believe exist in space and which will survive the birth and death of worlds and will continue long after the material universe has run down—its life is to run down."

The physical universe may be running down, he said, but "mind can reorganize it and reverse the process or can start it afresh."

Dublin Has Women Police

Duties Include Trailing Crooks At
Many Social Functions

Four women in Dublin walk about in the latest models in "bowlers" and the smartest frocks bought for them by the state.

They go to garden parties and society balls and weddings unconcerned about the cost of keeping in the fashion.

They form Dublin's women police force, probably the smallest force in the world.

When duty demands that they mix in social circles on the trail of crooks, fashionable clothes are provided for them by the police authorities as a disguise.

The bribes they have been offered have totalled thousands of pounds.

Their names are Mrs. O'Neill, Mrs. Lang, Miss Walters and Miss Naughton. Mrs. O'Neill recently captured a dope smuggler. She met him by arrangement, posing as an actress, and as she was buying a supply of cocaine she dropped her handkerchief.

It was the signal to detectives watching, and the man was arrested. These four have been threatened with death, and have had many exciting experiences as they wait to change their jobs for anything in the world.

Come In Many Colours

Mouse Fanciers Have Achieved Every
Colour But Green

The day of the green mouse may not be far ahead. This is the hope of fanciers who are now giving particular attention to their small charges in preparation for the mouse and rat show at St. Albans, Hertfordshire, England.

The entries for the show, which is under the auspices of the London and Southern Mouse and Rat Club, are confined to the outstanding specimens of about 30 different varieties of mice.

"Rivalry between the north and the south has been a big stimulus to mouse breeding," Mrs. A. R. Brower, who is organizing the exhibition, said. "By breeding on scientific lines we have now got mice in every colour except green."

"Very night while the mice are being prepared for the show it is necessary to rub them with soft silk to make their coats shine."

"Special diet is essential to keep them in perfect condition. Red mice have a tendency to get fat, and they have to be put on a slimming diet."

"We are taking special precautions to see that no cats stray into the hall to upset the serenity of the proceedings."

"So Robert married a social nobody, and just think, his ancestors came across in the 'Mayflower.'"

"That's all right; her folks came across with half a million."

These trans-Atlantic flights are becoming such a commonplace that pretty soon they will be crowded off the front page.

Water Levels Of Great Lakes Lower

Shuttle Condition Not Known Since
1888 Says Report

Water levels in the Great Lakes and St. Lawrence River during September were generally lower than for any similar period of the Canadian hydrographic service of the Department of Marine. Present conditions indicate that the levels of lakes Huron, Erie and Ontario will go even lower during the winter months unless there is heavy precipitation during the late autumn, the report states.

The September level in Montreal harbour was below the previous record for the same month since 1860 and would have been at least two inches lower only for the benefit derived by backwater from remedial dikes between the islands at the head of Lake St. Peter.

A Source Of Revenue

Canada Should Advertise Tomato
Juice As Healthful Drink

The orange growers of California made this industry what it is today by intelligent and persistent advertising. In this way they solved the problem of surplus crops. Now is the time to do the same thing for Ontario's great tomato-growing industry. We have so many tomatoes this year that they are selling at next to nothing and thousands of bushels will probably rot because no market exists for them. What a shame it is!

The tomato industry should follow the lead of the orange-growers of California and Florida. Tomato juice is just as invigorating, just as delightful, just as healthful as orange juice. And the best part of it all is the fact that we have the tomatoes right here at home instead of having to import oranges.

Telephones For Blind

Special Dial Instrument Being Supplied
By Hungarian Post Office

The Hungarian post office has made arrangements to supply special dial telephones for the use of blind subscribers.

The dial phones used in Budapest are so made that a call can be effected by turning a disc that shows 10 circular openings numbered from 0 to 9. There was nothing to distinguish these figures from each other by touch. At the request of any subscriber, the post office now provides, apparent to the touch, incising the figures, so that a blind person can easily manipulate them.

At the same time, the Telephone Department has issued a directory containing the most important telephone numbers, printed in Braille type for the use of the blind. The book contains space to inscribe additional numbers and addresses if necessary in Braille characters.

Develop Peat Beds

A Anrep, Dominion Government peat expert, will shortly make a survey of Manitoba's peat beds in connection with the use of peat in the manufacture of insulating material. Peat is present in considerable quantities in Southeastern and Eastern Manitoba.

A whirlpool in the ocean, 150 miles eastward of Cape Cod, so strong that it repels a ship, was recently described.

A man isn't really old until he begins to take fool exercises to retain his youth.

Sheffield, England, is laying a new road which is guaranteed to be non-skid.

Surplus coffee holdings in Brazil this year are so large that thousands of pounds are being burned for fuel.

The custom of spreading tablecloths on dining tables is said to date back to about 3400 B.C., in Egypt.

"What! Wearing your frock coat indoors?" "Well, why not?" "You will wear it out and then what will you wear at your funeral?" Pages 68 & 69, Yverdon.

"Women's bin me downfall!"
"Really! What sort of women?"
"Them wiv 'andbags'."—The Humorist, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

The 1931 Nobel prize for literature was awarded to Dr. Eric Axel Karfeldt, the Swedish lyric poet.

First shipment over the new extension of the Temiskaming & Northern Ontario Railway from Moose Factory consisted of \$8,000 pounds of furs, valued at \$160,000.

H. R. Pousette, until recently Canadian Consul General Trade Commissioner on the United States Pacific Coast, has been appointed trade commissioner at Liverpool, England.

Of the 105 aviation records recognized as official by the International Aeronautical Federation, 38 are held by France, 30 by Germany and only 19 by the United States.

A petition from 100,000 emigrants in Australia asking that they be brought back to Great Britain because of their sufferings is under advisement by the government.

Pioneer lumberman and former member of the Royal North West Mounted Police, as well as a pioneer of western Canada, Joshua Wallace Collins, 80, died recently in Toronto.

Lord Hugh Montague Trenchard, marshal of the Royal Air Force since 1927 and a veteran of the world war, has been appointed commissioner of the metropolitan police succeeding Lord Byng of Vimy.

A decision to cease dispatching ships to Russia was adopted by German ship owners on the grounds that recent strikes aboard German vessels in Soviet ports had been abetted by Russian authorities.

Senator Charles P. Beaulieu, Montreal, represented Canada at the opening of the Pan-American Postal Congress at Madrid. The Dominion's application for membership was ratified and Senator Beaulieu took his seat as an official delegate.

Protest From Apple Growers In France

Ask Government Protection Against Canadian and U.S. Imports

An apple tariff, aimed at Canadian and United States products, will come before Parliament when it reconvenes in November. The North American products have flooded the French market, creeping even into Rouen, the heart of the Normandy apple region. Growers have asked Parliament to protect them. French state railway engineers have been at work teaching peasants how to grow better apples and how to pack them.

More than 12,000,000 tons of coal are awaiting shipment from mines in the Ruhr.

An old man is able to hold a place in industry if he owns the industry.

"Must we go to this party in very smart clothes?"
"No, in any old things, just as you are now."—Buen Humor, Madrid.

W. N. U. 1912

Canada Is Entertaining Distinguished Visitors

Several Outstanding Men To Spend Some Time Here

Men and women who have achieved distinction in widely different walks of life were greeted at Quebec when they disembarked from the Canadian Pacific liner "Empress of Britain."

Heading the passenger list were Lord Trenchard, newly appointed to head the Metropolitan Police of London, England; Rafael Sabatini, author; Lord Rothermere, publisher; Hon. E. B. Ryckman, Canadian Minister of National Revenue; Hon. Raoul Dandurand, former president of the council of the League of Nations; Hon. Rodolphe Lemieux, former speaker of the Canadian House of Commons, and Viscount and Lady Ebrington.

Lord Ebrington is to judge at the horse show held in connection with the Royal Winter Fair at Toronto. Prior to the fair he and Lady Ebrington will cross Canada to Victoria, B.C.

Lord Trenchard is to visit Kitchener, Ont., to extend to the Canadian Scots Fusiliers the greetings of the Scots Fusiliers, of which regiment he is Colonel.

Senator Dandurand is returning from a meeting of the League of Nations. Lord Rothermere told ship's reporters he was back in Canada to see pulp and paper manufacturers.

Recipes For This Week

(By Betty Barclay)

PUMPKIN PRESERVES

Remove the rind and seeds from a small pumpkin and cut the flesh in inch cubes. Cook in a small amount of water until tender. Drain and weigh. For each pound of pumpkin allow 1 pound of sugar, 3 lemons and 2 ounces of ginger root. Slice the lemons and soak with the ginger over night in cold water. Next morning cook in same water until the lemon rind is tender. Add the sugar and the pumpkin, and simmer until the pumpkin is transparent. Drain and pack in jars. Cook syrup until it is thick and pour over the fruit in the jars. Seal tightly.

BEEF RELISH

1 quart beef, diced.
1 medium-sized white onion.
2 red peppers.
2 teaspoons salt.
1/2 cup grated horseradish.
1 pint vinegar.
1 cup sugar.

Cook the beef until they are tender and the skins slip off easily. Cut or chop the onion, peppers, and horseradish. Combine the ingredients. Cook the mixture until it is clear. Seal it in hot jars.

Cattle Reach Paris

Is First Consignment Canada Has Shipped To France

There recently arrived in Paris the first consignment of Canadian cattle ever shipped to France. The shipment consists of 172 head worth \$60,000 francs. All were in excellent health and there was not a single casualty in the crossing.

This will be followed by a second consignment shortly. Moreover, French agents will shortly proceed to Canada to purchase lean heifers and steers to replace France's greatly depleted herds. Canada can assimilate regular weekly shipments of Canadian cattle for fattening.

Owing to veterinary regulations, Canada and Switzerland are the only two countries allowed to export cattle to France, and Switzerland has no exportable surplus.

Jurisdiction Extended

High Commissioner For Canada Now

Considers All Departments
Jurisdiction over all departments of the Dominion Government will be exercised by Hon. G. Howard Ferguson, High Commissioner for Canada in Great Britain. An order-in-council passed when Hon. P. C. Larkin was High Commissioner, and which gave to Mr. Larkin additional jurisdiction, has been extended so as to apply to Mr. Ferguson. As things now stand the Canadian High Commissioner in London, England, will have supervision and control over officials of the Immigration, Trade and Commerce, Agriculture, and many other Government departments in the United Kingdom.

Windbreak Necessary

Fruits, cherries, and the hardier varieties of apples have been successfully grown on the Canadian prairies, but the orchards in all cases were protected by a suitable windbreak.

An historic entry among the steamship arrivals reads: "At Liverpool Parnworth from Churchill Manitoba."

WHAT NEW YORK IS WEARING

Illustrated Dressmaking Lesson Furnished With Every Pattern
Here's a lovely model in printed flat crepe, so smart and easy to wear. It's charmingly slender too.

The bodice cuts all in one unit it gains the skirt flounce, which makes it especially simple for home seamstress.

Another idea for this easily made model, that will make it appear entirely different, is to make it sleeveless with the cape collar as shown in miniature view.

Dainty chiffon print, eyelid belt and pastel suit silk make up most attractively with the capelet collar.

Then again for active sports, you can make it with the short sleeves and the capelet collar. Choose cotton, mesh, pique or linen.

Style No. 2922 may be had in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 32-inch material with 3/4 yard of 32-inch contrasting.

Wool crepe, tweed mixtures and cotton crepe are appropriate.

All patterns 20 cents in stamps or cash (cash preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

OCTOBER 25

PAUL IN CORINTH

Golden Text: "Now abideth faith, hope, and love, but the greatest of these is love."—1 Corinthians 13:13.

Lesson: Acts 18:1-17; 1 Corinthians 13:1-8, 13.

Devotional Reading: 1 Corinthians 13:1-8, 13.

Explanations and Comments

Paul the Tentmaker, verses 1-3.—Last week we left Paul at Berea. From there he went to the province of Achaia and, following what must have been a very disappointing experience in Athens, came to Corinth.

Here at Corinth Paul's ministry lasted eighteen months. He worked as a tentmaker by day and his trade of tentmaker by night. He preached at night. Just what Paul's trade was in a matter of doubt. Luther translated the word "carpet manufacturer." Chrysostom described Paul as standing in his workshop and stitching hides of leather together with his hands. It is generally thought that he made tents from the hair of goats which was called Cilician cloth from the fact that it was made in Cilicia, which was Tarsus, Paul's native home.

Freely to Jews and Greeks, verses 4, 5. In spite of many persecutions and of physical weakness (1 Corinthians 2:3-5), the lonely missionary "reasoned" in the synagogue every Sabbath, seeking to persuade Jews and Greeks to accept his teaching. The "Greeks" were proselytes in the synagogue, as the distinction of verse six shows.

The effect upon Paul of the coming of Silas and Timothy, who had remained in Macedonia, was electric. Encouraged by their presence, his spirit revived and his whole activity became more intense. Paul was a social soul. He worked best in harness with others.

Turning to the Gentiles, verses 6, 7.—The Jews opposed Paul and blasphemed. Malicious Henry says, they could not argue against Paul's words, but what they wanted in reason they got in language. Paul was then definitely decided to turn his efforts to the Gentiles.

Paul Encouraged, verses 8-11.—Despite his turning to the Gentiles, a noted Jew, Crispus, the ruler of the synagogue, and all his house believed Paul's message, and many others were baptized. Crispus with his own hands, 1 Corinthians 1:14. "The convert of the man meeting house" was not only fruitful in winning converts but in establishing disputes.

The conversion of an important personage like Crispus led to increased opposition. "I have grown so bitter that Paul began to question whether he ought not to come on again." Then came the word of the Lord to him in a vision to "cease from arguing him." "Be not afraid, but speak and hold fast thy peace; for I am with thee, and no man shall set on to harm thee; for I have many people in this city."

Existence Is Justified

Farm Schools Have Their Place in Educational System

The registration at colleges this fall is larger than ever, despite the depression in business. This increase in numbers of young men seeking an education is seen at the Ontario Agricultural College, and will doubtless be evident at the schools of agriculture as they open. With hard times experienced by almost everybody, the expenditure for college training is apparently regarded not as a luxury but as an investment that will bring full returns in later years.

When the Alberta Government decided that in the interests of economy one of the agricultural schools should be closed this year, a storm of protest was heard. These schools have justified their existence and have had wide influence as rallying centres for young men and women from the farms. Recently when Hon. Robert Weir visited Alberta, to confer with the Provincial Minister and other officials, he took occasion to state that it was part of his policy to establish schools in connection with a number of the experimental farms, and that one of these would be located at Lethbridge. Each school will accommodate not more than fifty students, which will ensure that individual attention be given and that practical experience be obtained in the fields.

Observation of the work done by the schools of this type that are already operating confirms the impression that they are best suited to the needs of young people who are to return to the farm.

They have even a wider field of influence than the larger colleges which provide courses equivalent to university standards. There need be no rivalry between the academic and the practical institutions for each supplements the other.

Knew Better

"So you're a salesman now, eh, Sambo? Do you stand behind the products you sell?"

"No, sah, I sho don't."

"Why, Sam, I'm surprised at you. You should always stand behind your product. What are you selling?"

"Mules."

Statistical studies in Illinois indicate that women live, on the average, two years longer than men, yet women have more physical defects and get sick oftener.

Royal Winter Fair

Note Of Confidence In Canadian Agriculture Is Sounded

A welcome and refreshing tone of confidence in Canadian agricultural conditions is sounded in the announcement by the management of the Royal Winter Fair that "prospects for entries at the Royal in all departments were never better than at the present moment."

"Exhibitors in the western Provinces are most anxious to continue to display their live stock and other agricultural products," the Royal's statement goes on, "and the Dominion Government and the Provincial Governments, recognizing the advantages of the Provinces continuing to occupy a prominent position at the Royal are contributing their usual financial assistance in transportation and in the selection of the live stock and agricultural products."

"There has been more than the usual number of inquiries from United States people this year and the Royal's survey of Ontario and Quebec indicates that there is considerably more live stock than usual ready for exhibition, so that we are very sanguine that the Winter Fair will open with the best and most representative live stock displays which we have ever had."

"Although general conditions last November were anything but favourable, 1930 was the Royal's record year, not only in exhibits and attendance, but the spirit of the people at the show was happier than at any previous event. We feel sure that the spirit of optimism at that time has served a very useful purpose in that it has enabled Canadians better to view recent economic adjustments with equanimity. We believe that a similar result will be secured at the forthcoming Royal Winter Fair, and be more noticeable perhaps on account of the greater contrast in conditions."

"The Royal this year is designed to commemorate its 'founding' and inauguration ten years ago, when in that depression that followed the war it helped so signally to restore confidence to Dominion agriculture generally. Since its 'birthday' at that time it has established itself as an institution to which Canadians all over Canada have pointed with a very considerable pride."

"The Royal is entering upon its new cycle under conditions which permit it to perform a service to Canada in influencing the general outlook and state of mind of the Canadian people, apart altogether from its influence upon agriculture. The aim of the management is therefore to have the Royal and everyone who exhibits there shall be better equipped to meet whatever problems may cross their path in the immediate future."

Air May Replace Gasoline

Car Without Usual Engine Equipment Demonstrated By Inventor

Roy J. Meyers, inventor, predicts motorized war may replace the tanks with air instead of gasoline.

Meyers demonstrated an automobile with a six cylinder radial type engine, minus the usual carburetor and ignition and cooling system, but equipped with a compressed air tank filled to 500 pounds pressure.

He pulled a lever and the car picked up speed quickly and smoothly, with a slight hiss of air from the exhaust valves. The motor was geared so the maximum speed reached was 35 miles per hour, but Meyers said that with a gear shift and a higher powered engine, speeds equal to or higher than those of gasoline driven cars may be attained.

As the air goes through the engine, forcing pistons up and down, much of it is recaptured and recompressed. He did not make clear how many pounds of air would be required per mile.

Australia has a record wool clip.

BABY'S OWN SOAP
It's Best for You and Baby too

THE HOUSE OF DREAMS-COME-TRUE
—BY—
MARGARET FEDLER
Author of "The Splendid Polly," "The Hermit Hodder & Stoughton, Ltd., London.

CHAPTER III.—Continued.

He made no answer, but released her instantly, and in her anxiety to show him how well she could manage she hurried on, struck the tip of the skate she was still wearing against a little hummock of frozen snow, and all but fell. He caught her as she stumbled.

"I think," he remarked drily, "you would do well to sacrifice your independence till your feet are on more equal terms with one another."

Jean laughed ruefully.

"I think I should," she agreed meekly.

He led her to where the prone trunk of a tree offered a seat of sorts, then went in search of the missing skate. Returning in a few moments, he knelt beside her and fastened it on—securely this time—to the slender foot she extended towards him.

"You're much too incompetent to be out on the ice alone," he remarked as he buckled the last strap.

A faint flush of annoyance rose in Jean's cheeks at the uncompromising frankness of the observation.

"What are your friends thinking of to let you do such a thing?" he pursued, blandly ignoring her mute indignation.

"I have no friends here. I am—my own mistress," she replied rather tartly.

He was still kneeling in the snow in front of her. Now he sat back on his heels and subjected her face to a sharp, swift scrutiny. Almost, she thought, she detected a sudden veiled suspicion in the keen glance.

"You're not the sort of girl to be knocking about—alone—at a hotel," he said at last, after thought.

"How do you know what I'm like?" she retorted quickly. "You are hardly qualified to judge."

"Pardon, mademoiselle, I do not know what you are—but I do know very certainly what you are not. And—smiling a little—"I think you have just had ocular demonstration of the fact that you're not accustomed to tending for yourself."

"There was something singularly attractive about his smile. It lightened his whole face, contradicting the settled gravity that seemed habitual to it, and Jean found herself smiling back in response.

"Well, as a matter of fact, I'm not," she admitted. "I came here with my father, and he was—was suddenly

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a baby as often as you like. Yet it is as effective for older children. Castoria's regulative help will bring relaxation and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name!

Castoria
CHILDREN CRY FOR IT

called away. I am going on to stay with friends."

"This is my last day here," he remarked with sudden irreverence. "I am off first thing tomorrow morning."

"You're not stopping at the hotel, are you?"

He shook his head.

"No. I'm staying at a friend's chalet a little way beyond it. Mais, voyons, mademoiselle, you will catch cold sitting there. Are you too frightened to try the ice again?"

It seemed to assume that her next essay would be made in his company. Jean spoke a little hurriedly.

"Oh, no, I was supposed to have a lesson with Monsieur Griot this morning. He is an instructor," she explained. "But he was engaged coaching someone else when I came out."

"And which is this Monsieur Griot? Can you see him?"

Jean's glance ranged over the seated figures on the rink.

"Yes. There he is."

His eyes followed the direction indicated.

"He seems to be well occupied at the moment," he commented. "Suppose—would you allow me to act as coach instead?"

She hesitated. This stranger appeared to be uncompromisingly progressive in his tendencies.

"I'm perfectly capable," he added curtly.

"I'm sure of that. But—"

His eyes twinkled.

"But it would not be quite 'comme il faut' is that it?"

"Well, it wouldn't, would it?" she retorted.

His face grew suddenly grave, and he noticed that when in repose there were deep, straight lines on either side of his mouth—lines that are usually only furrowed by severe suffering, either mental or physical.

"Mademoiselle," he said quickly. "To-day, it seems, we are two very lonely people. Couldn't we forget what is 'comme il faut' for once? We shall probably never meet again. We know nothing of each other—just ships that pass in the night—let us keep one another company—take this day together."

He drew a step nearer to her.

"Will you?" he said. "Will you?"

He was looking down at her with eyes that were curiously bright and compelling. There was a tense note in his voice which once again sent that disconcerting tremor of consciousness tingling through her blood.

She knew that his proposal was impetuous, unconventional, even regarded from the standpoint of the modern broad interpretation of the word convention, and that by every law of Mrs. Grey she ought to snub him soundly for his presumption and retrace her steps to the hotel with all the dignity at her command.

But she did none of these things. Instead, she stood hesitating, alternately flushing and paling beneath the oddly concentrated gaze he bent on her.

"I swear it shall bind you to nothing," he pursued urgently. "Not even recognizing me in the street should our ways ever chance to cross again. Though that is hardly likely to occur"—with a shrug—"seeing that mademoiselle is French and that I am rarely out of England. It will be just one day that we shall have shared together out of the whole of life, and after that the darkness again and a silence."

"I can promise you the silence," he added with a sudden harsh inflection.

It was that bitter note which won the day. In some subtle, subconscious way Jean sensed the pain which lay at the back of it. She answered impulsively.

"Very well. It shall be as you wish."

A rarely sweet smile curved the man's grave lips.

"Thank you," he said simply.

Stubborn Colds are Dangerous
Take
SCOTT'S EMULSION
of Norwegian Cod Liver Oil
To Build Resistance Easy to Digest

is a hut of sorts—erected as a shelter in case of sudden storms for people coming up from the lower valley to Montavan and beyond. It's a rough little shanty, but it would serve very well as a temporary safe a manger. It isn't a long clump," he added persuasively. "Are you too tired to take it on after your recent exertion?"

"Not in the least. But are you expecting a wayside refuge of that description to be fantastically endowed with a well-furnishedarder?"

"No. But I think my knapsack can make good the deficiency," he replied composedly.

Jean looked at him with dancing eyes. Having once yielded to the day's unconventional adventure, she had surrendered herself wholeheartedly to the enjoyment of it.

She made one reservation, however. Some instinct of self-protection prevented her from enlightening her companion as to her partly English nationality. There was no real necessity for it, seeing that he spoke French with the utmost fluency, and his assumption that she was a French woman seemed in some way to limit the feeling of intimacy, conferring on her, as it were, a little of the freedom of an incognito.

"A la bonne heure!" she exclaimed gaily. "Do you invite me to share your lunch, monsieur le professeur?"

"I've invited you to share my day, haven't I?" he replied, smiling.

They started for the bank, and when he had helped off her skates and removed his own, alighting them over his arm, they started off along the steep white track which wound its way upwards through the pine-woods.

As they left the bright sunlight that still glittered on the snowy slopes behind them, it seemed as though they plunged suddenly into another world—a mysterious, twilight place, where the snow undertook muffled the sound of their steps and the long shadows of the pines barred their path with sinister, distorted shapes.

(To Be Continued.)

Making More Butter

A statement just issued by the Dominion Dairy and Cold Storage Branch shows that butter production in Canada has apparently increased during the seven months ending July, 1921, by 25,378,728 pounds, or about 15.5 per cent, as compared with the corresponding period last year.

He came down to breakfast quite early on his first morning at the country hotel.

"Will you take tea, coffee or cocoa?" the waitress asked.

"Whichever you call it."

WHEN FOOD SOURS

ABOUT two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess food in the way to correct it with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and harmless. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia (prescribed by physicians for correcting excess acidity) a bottle—a very drug store.

The ideal diet for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth. (Made in Canada.)

Germany Building Glass Houses

Young Woman Architect Predicts They Will Be Common

People who live in glass houses will be no more exceptional than those whose dwellings are brick, stone or wood ten or fifteen years from now, according to Margaret V. Van Pelt, young New York architect. Miss Van Pelt, who recently became a member of a long established New York firm of architects, has returned to work in her New York office after a year studying trends in architecture in Europe.

"The Germans are building glass houses already," she explained. "I saw several of them. Of course the glass has to be of the strongest sort. They are using glass also to decorate interiors. Sometimes it is transparent and sometimes black."

"Glass, metal and strong colour contrasts in decorating exteriors are the newest notes in building design in Germany. The tendency toward geometric effects is even more marked than in our American skyscrapers. City blocks in which pink, blue, beige and other coloured houses stand side by side are being erected."

THE RHYMING OPTIMIST

By Aline Michaels

SUNFLOWER'S SONG

The sunflower owes allegiance To nothing save the sun;

But, ah! how can she meet the hours When day is done?

Her fealty is splendid, Her very heart she bares;

But as dusk deepens she must know What black despair!

I know how she must shudder Through the black abyss of night;

In all the whirling universe No golden light!

I know how she must ache for The signal-lights of dawn;

Her fear-filled vigils I can share. Since you are gone!

Yet eastward I am looking, Morning's gates are almost won;

I lift my petals up to hope. Come back, my sun!

How To Avoid Colds

Eating Plenty Of Vegetables and Fruit Is Good Preventative

"I caught a cold" is about the silliest expression heard today. No one tries to catch a cold. The trouble with us is that we do not try very hard to keep a cold from catching us.

That is why we meet so many today who are complaining about what happened when the weather changed. Only about 17 per cent of each 100 manage to get through a year without suffering from at least a mild cold. Some people suffer several times during the year.

One of the most important things you can do, both to prevent and to correct colds, is to keep your body as alkaline as possible. Vegetables, fruits and milk in the diet will do this.

If, however, you feel a cold coming on take a hot bath and get into a warm bed immediately. Then drink a full glass of hot lemonade. Sweat out those poisons. In the morning squeeze the juice of a lemon into a half glass of water. Stir in a half teaspoon of baking soda and drink it while it bubbles. Repeat this three times a day until your cold has disappeared. Remember, however, that if your cold fails to respond promptly your physician should be interviewed. A little cold is often a dangerous thing.

For Poor Sportsmen

Genoes' Has Ingenious Invention To Aid In Catching Fish

Poor sportsmen would welcome an ingenious invention to aid in catching fish. A Genoes' fisherman fitted a light and some clockwork to a number of lines. When the fish tugs at the line the light begins to flash and the clockwork starts to wind in the line.

When the fisherman gets to it all he has to do is remove the fish and rebait the hook to start the process again. The original invention utilized twenty lines.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

Tess—"I only got two weeks' vacation this year."

Bess—"How was that?"

Tess—"The boss went away the same time I did."

When You CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Aspirin was meant for just such times, for it insures your comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Aspirin tablets when you travel. Have some at home and keep some at the office. Like an efficient secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours. Aspirin is harmless, so keep it handy, keep it in mind, and use it. No man of affairs can afford to ignore the score and more of uses explained in the green directions. From a grumbling tooth to those rheumatic pains which seem almost to bend the knee, Aspirin tablets are ready with quick relief and always work. Neuralgia. Neuritis. Any nagging, needless pain.

Made in Canada

Will Take Precautions

Treasure Seekers May Carry Arms To Guard Against Sea Pirates

Precautions against hijackers, such as occasionally raid rich liquor laden ships, will be taken by Lieut.-Col. J. E. Leckie, head of the Vancouver expedition which in a few weeks will sail to Cocos Island to search for the buried treasure of ancient pirates.

Col. Leckie has communicated with the Department of National Defence seeking permission to arm his ship against eventualities on the sea or on Cocos Island.

Col. Leckie wants the use of machine guns and "pom-poms" which are in the arsenal at Esquimalt. Even if this permission is not granted, the ship will be armed against possible sea robbers. Col. Leckie has already arranged to carry privately owned machine guns and numerous rifles.

Freedom From Asthma. Asthma is one of the most distressing troubles, sudden in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Cure is the one help which can be depended upon. One who has tried other remedies without success, do not fail to get at once a package of this uniformly successful preparation.

An automatic clock is being installed in Paris, France, to give telephone subscribers the time of day in telegraphic signals. The subscriber dials the clock's number.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Seal.

Use Para-Seal to keep food fresh longer.

YOU'LL FIND A

hundred vital, saving uses for Para-Seal Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exciting uses: "Centre Fold" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

Little Helps For This Week

"In your patience possess ye your souls."—Luke xxi. 19.

Hold in thy murmurs Heaven arraignment.

The patient see God's loving face; Who bear their burdens uncomplaining.

'Tis they that win the Father's grace.

The soul loses command of itself when it is impatient. Wherever, what it submits without a murmur, it possesses itself in peace, and possesses God. To be impatient is to desire what we have not, or not to desire what we have. An impatient soul is a prey to passions unrestrained by reason of faith. What weakness, what delusion! When we acquiesce in an evil, it is no longer such. Why make a real calamity of it by resistance? Peace does not dwell in outward things, but within the soul. We may preserve it in the midst of bitter pain if our will remains firm and submissive. Peace in this life springs from acquiescence even in disagreeable things, not in an exemption from bearing them.

Dogs sometimes suffer from diabetes.

 A dance will be held in the East
 Community Hall on Friday night
 of this week.

TURKEY SHOOT
AT DOG POUND
 The Dog Pound baseball team
 are holding a turkey shoot at Dog
 Pound on Thursday, Oct. 29.
 Trap shooting and target shoot-
 ing. A chance to try out your
 big game rifles. 25c is the price.

Church of the Ascension
 (ANGLICAN)
 Sunday, October 25th.
 9.00 a.m. Holy Communion,
 10.00 a.m. Sunday School
 7.30 p.m. Evensong, Anthem
 and harvest hymns.
 Bible Class will commence on
 Monday, November 2nd, and will
 be held every Monday thereafter
 until April 30th, with the exception
 of the third Monday in the month.

The church was most beautifully
 decorated for the Harvest Festival
 by some of the ladies of the con-
 gregation. The services were very
 well attended. Mr. Cripps, the
 Rural Dean conducted the services
 in the evening. Mr. A. Stevens
 very kindly went to Innisfail to
 fetch him.

We wish to take this opportu-
 nity of thanking all those who con-
 tributed or helped in any way to
 make the services a success.

76 and Still Going Strong
 Mr. R. G. Gibson celebrated
 his 76th birthday on Sunday last.
 R. H. Gibson son of Mr. Gibson
 of Olds and family spent the day
 in town joining in the celebration
 at the home of W. K. Gibson.
 Mr. Gibson despite his advanced
 age is hale and hearty and
 says he is fit for another 76
 years. Here's hoping.

FIRE WEST OF AIRDRIE
 At the time of going to press
 we hear of a fire raging in the
 Airdrie district around the Angus
 Robertson place. No particulars
 are yet to hand although we hear
 Angus Robertson has suffered
 considerable loss.

NO NEW CASES OF
INFANTILE PARALYSIS
 We hear the Oneil girl who is
 down with infantile paralysis is
 doing as well as can be expected.
 Her general condition shows an
 improvement although her legs
 are still paralyzed. No further
 cases have been reported in the
 Crossfield district.

Weekly Sermonette
 "Truth is not only stranger
 than fiction, but also it is a
 stranger to some people."

 ments cancelled.

THURSDAY, OCT. 22nd, 1931

Mr. R. S. McClelland has rented
 the house on Oliver Street recently
 vacated by Mr. Mobbs.

A meeting of the Crossfield Fel-
 lowship Club will be held in the
 Masonic Hall on Tuesday evening
 October 27. All members and
 prospective new members are urged
 to attend.

School Literary Society
Held First Meeting

The opening meeting of the
 School Literary Society was held
 in the Masonic Hall, Oct. 16. Mac
 Purvis was elected chairman for
 the afternoon and Majory Young
 secretary. A committee to draw
 up a slate of officers to be voted on
 at the next meeting Oct. 30, was
 elected.

The presentation of the cups and
 special prizes won by Crossfield
 pupils at the School Fair was made
 by Mr. Collier.

Dr. Whillans a Winner

Dr. Whillans proved to be the
 best guesser on Saturday last
 when his guess of 19 pounds and
 13 ounces won the turkey. 1913
 was the year in which Dr. Whil-
 lans came to Crossfield and it
 proved to be a lucky omen, and
 was within one ounce of the ac-
 tual weight of the gobler.

Two turkeys were also disposed
 at the raffle, Mr. McMillan of
 the government road gang and
 Ralph McFadyen holding the
 lucky numbers.

The baseball team are dispos-
 ing of these turkeys in order to
 pay off some of their debts of two
 years ago.

GET BUSY

About a month ago the Village
 Constable was instructed by
 the Council to make an inspection
 of the stove pipes and furnace
 pipes of the residences and stores
 in the village. This was done
 and in many cases cleaning and
 new pipes were the instructions
 given to the occupants. We are
 informed that in many cases the
 instructions have not been carried
 out. Fire prevention is most im-
 portant and the Council have
 done their part, it is now up to
 you. With cold weather just
 around the corner better clean
 the pipes and replace the burnt
 ones today.

Mr. Tightwad!—If you must
 borrow The Crossfield Chronicle
 somewhere, come around to this
 office and do it. We don't like
 to have our regular customers
 bothered. Thank you.

Local and General

Miss M. Robinson spent a few
 days in Calgary visiting friends.
 Frances McFadyen of Rosebud
 spent the week-end at her home
 here.

Ray Gilchrist returned home on
 Tuesday after spending the week-
 end with relatives at Maple Creek.

W. K. Gibson shipped a carload
 of hogs to Calgary on Tuesday
 night.

Cal Calhoun and Fred Collins
 were Calgary visitors the first
 of the week. Fred took Cal along
 to pick him out a big game gun.
 Mr. and Mrs. A. Cruickshank
 and Florence and Mr. and Mrs.
 Fred Landers were visitors at
 High River on Sunday.

Mrs. C. Casey entertained at
 tea on Saturday afternoon last in
 honor of Mrs. M. Casey who is
 leaving this week for Leslieville.
 R. M. McCool, M.L.A. address-
 ed a large gathering at a picnic
 at Bragg Creek on Saturday af-
 ternoon.

Mr. and Mrs. Merle Casey and
 family are leaving this week for
 Leslieville where they have pur-
 chased a farm and will in future
 reside.

Rev. H. Young occupied the
 pulpit at the North Hill United
 Church, Calgary, on Sunday last,
 exchanging pulpits with Rev. Rex
 Brown who was in Crossfield.

The Village Council are having
 the road leading to the highway
 south of town put in first class
 condition. The road has been
 scarified and new gravel is being
 put on.

The Village Council have had
 the skating rink levelled off and
 who ever takes on the job of
 putting in the ice will find that
 it will take a lot less water than
 heretofore.

A whist drive and dance will
 be held in the U. F. A. Hall on
 Friday, October 30th under the
 auspices of the Anglican Church.
 Refreshments free. Whist drive
 only 25c. Dance and whist drive
 50c.

There is some talk locally of
 holding a Seed Grain Fair and
 Poultry Show in Crossfield this
 winter. Government grants are
 available for these shows. If in-
 terested drop in at the Chronicle
 office.

Its just too bad that a farmer
 can't make as much money from
 a good hog as the city man can
 make from a blind pig! The fact
 remains however, that both can
 save money by getting storm
 doors and windows from Harry
 at the Atlas Lumber Yard.

Miss Evelyn Moie returned on
 Wednesday afternoon from Cal-
 gary where she has been a patient
 at the Holy Cross Hospital for the
 past two weeks suffering with an
 infected knee, which is now prac-
 tically all right again.

A Lollipop Tea and Sale of
 Home Cooking will be held in the
 Chronicle office on Saturday af-
 ternoon, October 24th by the
 Ladies Aid of the United Church.
 Donations gratefully received.
